Right Consultancy

Supporting the NGO Community

Who we are

We are a consulting firm offering a variety of innovative services to improve and strengthen the NGO community in India. We aim to become India's premier development consulting firm to the not for profit sector. We intend to promote voluntary and development actions through enabling NGOs in India. Right Consultancy supports and assists NGOs to promote, manage and sustain their activities to further enhance and enrich their performance and growth.

We are a team of highly qualified and expert development professionals providing professional services to NGOs at an affordable cost. We believe that concurrent up gradation of knowledge and skill development is highly necessary for the sustainable growth of NGOs and our purpose as an NGO Consultancy is to enable and equip NGOs to realise their mission by making use of modern practices and tools.

What we offer

Our services include capacity building for NGOs, monitoring and evaluation, not for profit organisations audits, donor audits, organizational development, research studies and documentation. We also provided value added services to NGOs in preparing brochure, annual reports, project report and website development. We realize that registering a not for profit organisation is easy. Our core service is the difficult part of ensuring that organisations reach their highest potential.

Right Consultancy is not a direct funding agency nor provides funds/grants, but helps NGOs to assist funds/grants by way of preparing project proposals, guiding and training them on fund raising and proposal writing besides providing them useful information and resources on resource mobilisation.

Specialisation

- ✓ Fund raising
- ✓ Trainings and Capacity building
- ✓ Microfinance
- ✓ Human Resource Development
- ✓ Livelihoods
- ✓ Micro insurance
- ✓ NGO Documentation and publications
- ✓ Development studies and research

Our team
